

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

T O T H E
Forty-eighth VOLUME

O F T H E
Philosophical Transactions,
For the YEARS 1753 and 1754.

A.

AGARIC of the Oak, Experiments concerning the Use
of it in stopping Hæmorrhages, by Mr. *Samuel Sharp*,
p. 591.

_____ by Mr. *Joseph Warner*, p. 591.

_____ Some Observations on that lately
applied after Amputations, with regard to the determining
its Species, by Mr. *William Watson*, p. 811.

_____ Letter concerning the Use of it as a
Styptic, by Mr. *Joseph Warner*, p. 813.

_____ from Mr. *B. Gooch*, p. 814.

Ages of Homer and Hesiod, Letter concerning them, from
the Rev. *Geo. Costard*, M. A. to the Right Honourable
the Earl of *Macclesfield*, Pref. R. S. p. 441.

I N D E X.

- Air*, Observations on the Electricity thereof, by the Abbe Mazeas, p. 377.
- Alcyonium molle*, p. 359.
- Altar*, Roman, an Account of, with its Inscription, by Sir Francis Drake; also a brief Explication of its Inscription by Dr. John Ward, p. 33.
- Angles*, a Contrivance for measuring small ones, by Mr. John Dollond, p. 178.
- Instrument for measuring small ones, explained by Mr. John Dollond, p. 551.
- Annuity for Life*, concerning its Value, and the Probability of Survivorship, by Mr. J. Dodson, p. 487.
- Antimony*, Medical and Chemical Observations upon it, by Dr. John Huxham, p. 832.
- Antiquities* newly discovered at *Pertici*, p. 825.
- Appleby*, (Mr.) his Process to make Sea-water fresh, with some Experiments therewith, by Mr. William Watson, p. 69.
- Archimedes*, Observations on Father Kircher's Opinion concerning his burning the Fleet of *Marcellus*, by Dr. James Parsons, p. 621.
- Arderon* (Mr. William) Observations on the late severe cold Weather, p. 507.
- Astronomical Observations*, made in *Surry-street*, London, by Dr. John Bevis, and James Short, M. A. p. 301.

B.

- Baker* (Mr. Henry), Account of some uncommon fossile Bodies, p. 117.
- (Mr. David Erskine) Letter to the Rev. Dr. Tho. Birch, Secr. R. S. with an Account of an Earthquake felt at *York* the 19th of April 1754, p. 564.
- Barometer* and Weather at *Dublin*, from 7 March 1752 to 28 February 1753, by James Simon Esq; p. 320.
- Barros* (M. De), Account of his Memoir concerning certain Phænomena observed by him in the last Transit of *Mercury*, by J. Short, M. A. p. 361.
- Belemuites*, Dissertation on it by Mr. Gustavus Brander, p. 803.

Bevis,

I N D E X.

- Bevis** (Dr. *John*) Letter to *James Short*, M. A. concerning Mr. *Gascoigne's* Invention of the Micrometer, p. 190.
- Observations of the Transit of *Mercury* over the Sun, May 6, 1753, p. 193.
- Astronomical Observations made by him and *James Short*, M. A. p. 301.
- Birch** (Rev. *Thomas*, D. D. Secr. R. S.), additional Remark to one of Mr. *W. Watson's*, in his Account of the Abbè *Nollet's* Letter concerning Electricity, p. 484.
- Bond** (Dr. *John*), Experiments and Observations on the Copper-Springs at *Wicklown* in *Ireland*, in a Letter to Sir *Peter Thompson*, Knight, p. 181.
- Bones** softened and distorted, an Account of, by Dr. *Hofsy*, of *Paris*, p. 26.
- a remarkable Instance of their Fragility, Flexibility, and Dissolution, communicated by Dr. *John Pringle*, p. 297.
- of an Elephant, found at *Leydown*, in the Isle of *Sheppey*, p. 626.
- Bonnet** (Monf. of *Geneva*), Extract of his Letter to Dr. *John Clephane*, concerning Inoculation, p. 818.
- Borlase** (Rev. Mr. *William*), concerning the great Alterations which the Islands of *Sylley* have undergone since the Time of the Antients, p. 55.
- an Account of a Storm of Thunder and Lightning near *Ludgvan* in *Cornwall*, p. 86.
- Bose** (Professor), Extract of his Letter to the Right Honourable the Earl of *Macclesfield*, Pres. R. S. p. 358.
- Boze** (Monf.), Extract of his History of the Emperor *Tetricus*, explained and illustrated by Medals, by Dr. *John Ward*, p. 124.
- Brakenridge** (Rev. *William*, D. D.), Letter to *Geo. Lewis Scot*, Esq; concerning the Number of Inhabitants within the *London Bills* of Mortality, p. 788.
- Brander** (Mr. *Gustavus*), Letter to *Smart Letbieullier*, Esq; with a Dissertation on the *Belemnites*, p. 803.
- Bristol**, the Number of People in that City calculated by *John Browning*, Esq; p. 217.

I N D E X.

Browning (*John*, Esq;), Calculation of the Number of People in the City of *Bristol*, p. 217.

Byssus of the Antients, p. 360.

C.

Calculus, a large one found in a Mare. p. 800.

Canton (*John*, M. A.), Electrical Experiments, with an Attempt to account for their several Phænomena, with some Observations on Thunder-Clouds, p. 350.

—— Letter to the Right Honourable the Earl of *Macclesfield*, Pref. R. S. concerning some new Electrical Experiments, p. 780.

Catalogue of Fifty Plants from *Chelsea*, for 1752, presented to the Royal Society by Dr. *John Wilmer*, p. 110.

—— of Fifty Plants from *Chelsea*, for 1753, presented to the Royal Society by Dr. *John Wilmer*, p. 528.

Cataract, Second Account of a new Method of opening the Cornea, for taking it away, by Mr. *Sam. Sharp*, p. 322.

Character (*Palmyrene*), an Explication of all the Inscriptions therein hitherto published, by the Rev. *John Swinton*, M. A. p. 690.

Chevalier (*Joannes*), *Observationes eclipsium satellitum Jovis, habitæ Uliſſipone, Anno 1753*, p. 546.

—— *Observatio solis defectus, Uliſſipone habita die 26^a Octobris 1753*, p. 546.

Circle, some remarkable Properties of it, useful in resolving Fractions of multinomial Denominators into more simple ones, by Mr. *John Landen*, p. 566.

Clairaut (Mr. *Alexis*), his Translation and Explanation of some Articles of his Book, intituled, *Theorie de la Figure de la Terre*, p. 73.

—— Letter to the Rev. Dr. *Tho. Birch*, Secr. R. S. with a Comparison of M. *De Courtevron*'s and Mr. *Mekvil*'s Notions concerning the different Refrangibility of the Rays of Light, p. 776.

Cluster-Polype, Letter from Mr. *John Ellis* to Mr. *Peter Collinson*, concerning one, p. 305.

Constantinople, Account of the late Earthquake there, p. 819.

Copper

I N D E X.

Copper Springs, in the County of *Wicklow*, an Account of, by the Rev. Dr. *William Henry*, p. 94.

———— Experiments and Observations on them by *John Bond*, M. D. p. 181.

Coralline, Observations on a remarkable one, by Mr. *John Ellis*, p. 115.

———— a particular Species of it described by Mr. *John Ellis*, p. 504.

———— concerning the animal Life of some which resemble very minute Trees, p. 627.

Cornea, Description of a new Method of opening it, in order to extract the Cornea, by Mr. *Samuel Sharp*, p. 161.

———— Second Account of the new Method of opening it, for taking away the Cataract, by Mr. *Sam. Sharp*, p. 322.

da Costa (*Emanuel Mendez*), Letter to the Rev. Dr. *Tho. Birch*, Sec. R. S. concerning the Fossil found at *Dudley* in *Staffordshire*, and described in *Phil. Tr.* N^o 496.

Costard (Rev. *George*), Letter to Dr. *Bevis*, concerning the Year of the Eclipse foretold by *Thales*, p. 17.

———— Letter to Dr. *Bevis*, concerning an Eclipse mentioned by *Xenophon*, p. 155.

———— concerning the Ages of *Homer* and *Hesiod*, p. 441.

Crusio (*Carlo*), Account of an extraordinary Disease of the Skin, and its Cure, p. 579.

Crystalline Humour, Description of a new Method of extracting it, by opening the Cornea, by Mr. *Samuel Sharp*, p. 161.

D.

Demidoff (Monf.), Extract from his Thermometrical Observations on the Borders of *Siberia*, after p. 107.

Dodson Mr. *James*), Extract of a Letter of his to Mr. *William Mountaine*, p. 273.

———— Letter to the Right Honourable the Earl of *Macclesfield*, Pref. R. S. concerning the Value of an Annuity for Life, and the Probability of Survivorship, p. 487.

———— and *Mountaine* (Messieurs), Advantages of a periodic Review of the Variation of the Needle, p. 875.

Dollond

I N D E X.

Dollond (Mr. *John*), Letter to Mr. *James Short*, concerning an Improvement in refracting Telescopes, p. 103.

—— Description of a Contrivance for measuring small Angles, p. 178.

—— Explanation of an Instrument for measuring small Angles, p. 551.

E.

Earthquake, Account of one felt at *York* the 19th of *April* 1754, by Mr. *David Erskine Baker*, p. 564.

—— Account of the late one at *Constantinople*, p. 819.

Eclipse, concerning the Year of that foretold by *Tales*, by the Rev. Mr. *Geo. Costard*, p. 17.

—— an Account of it, by the Rev. *W. Stukely*, M. D. p. 221.

—— one mentioned by *Xenophon*, a Letter from the Rev. *Geo. Costard*, A. M. to Dr. *John Bevis*, concerning it, p. 155.

Eclipses (Solar), a mechanical Contrivance for exhibiting the Time, Quantity, and Duration, of them, in all Places of the Earth, by Mr. *James Ferguson*, p. 520.

Eclipsium satellitum Jovis observationes Uliſſipone habitæ Anno 1753, a *Joanne Chevalier*, p. 546.

Edwards (Mr. *George*), Letter to Mr. *Peter Collinson* concerning the Pheasant of *Pensylvania*, and the *Otis minor*, p. 499.

Electrical Experiments made at *Paris*, a Letter concerning some from Mr. *Benj. Wilson* to the Right Honourable the Earl of *Macclesfield*, Pref. R. S. p. 347.

—— an Attempt to account for their several Phænomena, together with some Observations on Thunder-Clouds, by *John Canton*, M. A. p. 350.

Electricity of the Air, Observations thereon by the Abbè *Mazeas*, p. 377.

—— Letters concerning it by the Abbè *Nollet*, p. 201.

—— Answers to several Queries concerning Experiments thereof made with a Kite, by Dr. *John Lining*, p. 757.

Electricity

I N D E X.

Electricity of the Air, some Account of the Effects thereof in the County-Hospital at *Shrewsbury*, by Dr. *Cbeney Hart*, p. 786.

Elephant, several Bones of one found at *Leysdown* in the Isle of *Skeppey*, p. 626.

Ellis (Mr. *John*), Observations on a remarkable Coralline, p. 115.

Letter to Mr. *Peter Collinson*, concerning a Cluster-Polype, p. 305.

Letter to Mr. *Peter Collinson*, concerning a particular Species of Coralline, p. 504.

Letter to Mr. *Peter Collinson*, concerning the animal Life of Corallines that look like minute Trees, p. 627.

Empyema, its Operation successfully performed by Mr. *Joseph Warner*, p. 270.

Equinoxes, a Treatise on their Precession, &c. by M. *de St. Jacques de Silvabelle*, p. 385.

Euler (M.), Letters concerning a Theorem of his, for correcting the Aberrations in the Object-Glasses of refracting Telescopes, p. 287.

Experiments of Fish and Flesh preserved in Lime-water, by *Francis Hume*, M. D. p. 163.

on the Copper-Springs of *Wicklow* in *Ireland*, by *John Bond*, M. D. p. 181.

upon a Machine for measuring the Way of a Ship at Sea, by Mr. *J. Smeaton*, p. 532.

concerning the Use of Agaric of the Oak in stopping Hæmorrhages, by Mr. *Sam. Sharp*, p. 588.

made with a new Pyrometer, by Mr. *John Smeaton*, p. 610.

(*Electrical*), made at *Paris*, in a Letter from Mr. *Benjamin Wilson* to the Right Honourable the Earl of *Macclesfield*, Pres. R. S. p. 347.

with an Attempt to account for their Phænomena, together with some Observations on Thunder-Clouds, by *John Canton*, M. A. p. 350.

Experiments

I N D E X.

Experiments (Electrical), made with a Kite, Answers to several Queries concerning them, by Dr. *John Lining*, p. 757.

by Professor *Winkler*, p. 772.

concerning some new ones, by J. *Canton*, M. A. p. 780.

F.

Ferguson (Mr. *James*), Description of a Piece of Mechanism for exhibiting the Time, Quantity, and Duration, of solar Eclipses, in all Parts of the Earth, p. 520.

Fireball, Account of one seen at *Hornsey* by Mr. *William Hirst*, p. 773.

Fish and Flesh preserved in Lime-water, Experiments of, by *Francis Hume*, M. D. p. 163.

— Account of some Trials to keep them sweet with Lime-water, by the Rev. *Stephen Hales*, D. D. p. 826.

— Account of Mr. *Samuel Tull's* Method of castrating them, by Mr. *Wm. Watson*, p. 870.

Flora Sibirica, (Vol. II. of Professor *Gmelin*) Extracts of it by Mr. *William Watson*, p. 141.

Fossil Bodies, uncommon Account of, by Mr. *Henry Baker*, p. 117.

Fossil found at *Dudley* in *Shropshire*, and described in *Phil. Trans.* N^o 496, Letter concerning it, from Mr. *Emanuel Mendez da Costa* to the Rev. Dr. *Tho. Birch*. Secr. R. S. p. 286.

G.

Gaol-Fever, an Account of several Persons seized with it in *Newgate*, by Dr. *Pringle*, p. 42.

Gascoigne (Mr.), concerning his Invention of the Micro-meter, in a Letter from Dr. *Bevis* to Mr. *James Short*, p. 190.

Gaubil (Father), Extract of Two Letters of his from *Pekin*, p. 309.

Giants Causeway, in the County of *Antrim*, in *Ireland*, a farther Account thereof, by the Reverend Dr. *Pococke*, p. 226.

Giants

I N D E X.

- Giants Causeway*, an Account thereof, to the Rev. *Tho. Birch*, D. D. Sec. R. S. by the same, *p. 238.*
- Girard (Albert)*, Commentary on an obscure Passage of his in his Commentary on *Simon Stevin*, by Mr. Professor *Simpson*, of *Glasgow*, *p. 368.*
- Gmelin* (Professor), Account of his *Flora Sibirica*, by Mr. *William Watson*, *p. 141.*
- Gray* (Sir *James*, Baronet), Extract of his Letter to Sir *Tho. Robinson*, Knight of the Bath, about some new-discovered Antiquities at *Portici*, *p. 825.*
- H.
- Hæmorrhages*, Experiments concerning the Use of the Agaric of the Oak in stopping them, by Mr. *S. Sharp*, *p. 588.*
 ————— by Mr. *Joseph Warner*, *p. 591.*
- Hales* (Rev. Dr. *Stephen*, D. D.), Account of some Trials to keep Water and Fish sweet with Lime-water, *p. 826.*
- Hart* (Dr. *Cheney*), Letter to Mr. *William Watson*, with some Account of the Effects of Electricity in the County-Hospital at *Skrewsbury*, *p. 786.*
- Heberden* (Dr. *Thomas*), Continuation of the Account of the Weather in *Madeira*, *p. 617.*
- Henry* (Rev. Dr. *William*), Account of an extraordinary Stream of Wind in the Parishes of *Thermonomungan* and *Urney*, in the County of *Tyrone*, *p. 1.*
 ————— concerning the Copper-Springs in the County of *Wicklow*, *p. 94.*
- Herculaneum*, concerning the Antiquities dug up there, by Signor *Camillo Paderni*, *p. 71.*
 ————— Notice of some Antiquities lately discovered there, by the Rev. Mr. *Joseph Spencer*, *p. 486.*
 ————— Extract of a Letter from *Camillo Paderni*, relating to the late Discoveries there, *p. 821.*
- Hesiod* and *Homer*, concerning their Ages, by the Rev. *Geo. Costard*, M. A. *p. 441.*
- Hirſt*, (Mr. *William*), Account of a Fireball seen at *Hornsey*, *p. 772.*
- Holly*, Remarks concerning the Sex of it, by Mr. *John Martyn*, *p. 613.*

I N D E X.

- Homer and Hesiod*, concerning their Ages; by the Rev. *Geo. Costard*, M. A. p. 441.
- Hornsey*, Account of a Fire-ball seen there, by Mr. *Wm. Hirst*, p. 772.
- Hofsy* (Dr. *Ambrose*), an Account of the Case of *Anne Elizabeth Queriot*, of *Paris*, whose Bones were distorted and softened, by Dr. *Ambrose Hofsy*, p. 26.
- Human Life*, Attempt to establish a Rule for its probable Duration, by *W. Kerseeboom*, p. 239.
- Hume* (Dr. *Francis*), Experiments on Fish and Flesh preserved in Lime-water, p. 163.
- Huxham* (Dr. *John*), Observations medical and chemical upon Antimony, p. 832.

I.

- Jacob* (Mr.), Account of several Bones of an Elephant found at *Leydsdown* in the Island of *Sheppey*, in Two Letters to Dr. *James Parsons*, p. 626.
- Incarville* (Father *De*), Letter from *Pekin* to the late Dr. *Cromwell Mortimer*, Secr. R. S. p. 253.
- Inhabitants*, Number of, within the *London Mortality Bills*, p. 788.
- Inoculation*, Extract of a Letter from *Monf. Bonnet* of *Geneva*, to Dr. *John Clephane*, concerning it, p. 818.
- Inscription*, Attempt to explain an ancient *Roman* one, cut upon a Stone lately found at *Bath*; by Dr. *John Ward*, p. 332.

(*Palmyrene*), and Explication of all hitherto published, by the Rev. *John Swinton*, M. A. p. 690.

K.

- Kerseeboom* (*William*), View of the Relation between Dr. *Halley's* Tables and M. *De Buffon's* Notions, for establishing a Rule for the probable Duration of human Life, p. 239.
- Kircher* (Father), Observations upon his Opinion concerning the burning the Fleet of *Marcellus* by *Archimedes*; by Dr. *James Parsons*, p. 621.
- Kite* (electrical), Answer to several Queries concerning Experiments made with it, by Dr. *John Lining*, p. 757.

Landen

I N D E X.

L.

Landen (Mr. *John*), an Investigation of some remarkable Properties of the Circle, &c. p. 566.

Language and Character (*Palmyrene*), and Explication of all the Inscriptions therein hitherto published, in Five Letters from the Rev. *John Swinton*, M. A. to the Rev. Dr. *Tho. Birch*, Secr. R. S. p. 690.

Letter, from the Rev. Mr. *George Cossard*, to Dr. *Bevis*, concerning the Year of the Eclipse foretold by *Tbales*, p. 17.

Letters relating to a Theorem of M. *Euler's*, for correcting the Aberrations in the Object-glasses of refracting Telescopes, p. 287.

Lewis (*William*, M. B.) experimental Examination of a metallic Substance, called *Platina*, said to be found in gold Mines, p. 638.

Lime-water, Trials to keep Water and Fish sweet with it, by the Rev. *Stephen Hales*, D. D. p. 826.

Lining (Dr. *John*), Letter to the Rev. Dr. *Tho. Birch*, Secr. R. S. concerning the Quantity of Rain fallen in *South-Carolina*, from *January 1738* to *December 1752*, p. 284.

Answers to several Queries sent to him concerning his Experiment of Electricity with a Kite, p. 757.

Answer to his Query concerning the Death of Professor *Richman*, by Mr. *William Watson*, p. 765.

De L'Isle (Monf. *J. N.*), Letter to the Rev. *James Bradley*, D. D. about the Parallax of *Mars*, p. 512.

Logarithmic Lines on *Gunter's Scale*, their Construction, by Mr. *John Robertson*, p. 96.

London Mortality Bills, Number of Inhabitants within them, p. 788.

M.

Macclesfield (Right Honourable *George Earl of*), Extract from the Thermometrical Observations of M. *Demidoff* at *Solekamsky*, on the Borders of *Siberia*, after p. 107.

I N D E X.

Machine for measuring a Ship's Way at Sea, Experiments on it, by Mr. *John Smeaton*, p. 532.

Mackenzie (Dr. *Murdock*), Letter from *Constantinople* concerning the late Earthquake there, p. 819.

Madeira, Continuation of the Account of the Weather there, by Dr. *Tbo. Heberden*, p. 617.

Mare, a large Calculus found in one, p. 800.

Mars, his Parallax determined from Observations of the Rev. Dr. *James Bradley*, D. D. and the Abbé *De la Caille*, p. 512.

Martyn (Mr. *Jahn*), Remarks concerning the Sex of Holly, p. 613.

Mazeas (Abbé), Observations on the Electricity of the Air, p. 377.

Melvil (Mr. *T.*), Letter to the Rev. Dr. *James Bradley*, with a Discourse concerning the different Refrangibility of the Rays of Light, p. 261.

Mercury, Observations of his Transfit over the Sun, May 6, 1753, by Dr. *John Bevis*, and *James Short*, M. A. p. 192.

his Transfit over the Sun, May 6, 1753, observ'd at *Antigua*, by Mr. *William Shervington*, p. 318.

Phenomena observed therein, by M. *De Barros*, p. 361.

Micrometer, of the Invention of a new one, by the late *Servington Savery*, Esq; in a Letter to Mr. *James Short*, p. 165.

of Mr. *Gascoign*'s Invention thereof, in a Letter from Dr. *John Bevis* to Mr. *James Short*, p. 190.

Miles (Rev. *Henry*, D. D), Observations on the late severe cold Weather, p. 510.

Letter to *John Canton*, M. A. concerning the late hard Weather, p. 525.

Miller (Mr. *Philip*), Letter to Mr. *Wm. Watson*, concerning a Mistake of Professor *Gmelin*, concerning the *Spondylium vulgare hirsutum*, of C. B. p. 153.

Mountaine (Mr. *William*), Extract of a Letter from Mr. *James Dodson* to him, p. 273.

Mountaine

I N D E X.

Mountain and Dodson (Messieurs), Advantages of a periodical Review of the Variation of the magnetic Needle, p. 875.

N.

Nollet (Abbé de), Account of his Letters concerning Electricity, by Mr. *William Watson*, p. 201.

————— additional Remark to one of Mr. *Watson's*, on his Letter on Electricity, by the Rev. *Tho. Birch*, D. D. Secr. R. S. p. 484.

O.

Observations of *Mercury's* Transit over the Sun, May 6, 1753, by Dr. *John Bevis* and Mr. *James Short*, p. 192.

————— by Mr. *William Shervington*, in *Antigua*, p. 318.

————— (astronomical) in *Surry-street*, by Dr. *John Bevis*, and *James Short*, M. A. p. 301.

————— on the late severe cold Weather, by Mr. *Wm. Arderon*, and the Rev. *Hen. Miles*, D. D. p. 507.

————— for determining the Parallax of *Mars*, made by the Rev. *James Bradley*, D. D. and the Abbé *de la Caille*, p. 512.

————— medical and chemical upon Antimony, by Dr. *John Huxham*, p. 832.

Ovis minor, Account of, by Mr. *George Edwards*, p. 502.

P.

Paderni (*Camillo*) concerning the Antiquities dug up at *Herculaneum*, p. 71.

————— Extract of his Letter to *Tho. Hollis*, Esq; p. 634.

————— Extract of a Letter to *Tho. Hollis*, Esq; relating to the late Discoveries at *Herculaneum*, p. 821.

Palmyrene, see *Language*.

Parallax of *Mars* determined, from Observations by the Rev. *James Bradley*, D. D. and the Abbé *de la Caille*, p. 512.

Parsons (Dr. *James*) Observations upon Father *Kircher's* Opinion concerning the Burning of the Fleet of *Marcellus* by *Archimedes*, p. 621.

Redivulus marinus major trilobos, p. 286.

I N D E X:

Pensylvania Pheasant, a Letter from Mr. *Geo. Edwards* to Mr. *Peter Collinson* concerning it and the *Otis minor*, p. 499.
Pheasant of *Pensylvania* described, by Mr. *Geo. Edwards*, p. 499.

Plants, Catalogue of Fifty, from *Chelsea*, for 1752, presented to the R. Society by Dr. *John Wilmer*, p. 110.

—— Catalogue of Fifty, from *Chelsea*, for 1753, presented to the R. Society by Dr. *John Wilmer*, p. 528.

Platina del Pinto, experimental Examination of it, by Dr. *William Lewis*, p. 638.

Pococke (Rev. *Richard*, L. L. D.) further Account of the *Giants Causeway*, in the County of *Antrim* in *Ireland*, p. 226.

—— on the same Subject, in a Letter to the Rev. *Tho. Birch*, D. D. Sec. R. S. p. 238.

Portici, Antiquities newly discovered there, p. 825.

Precession of the Equinoxes, a Treatise thereon, by M. *De St. Jaques Silvabelle*, p. 385.

Pringle (Dr. *John*), An Account of the Gaol-Fever with which several Persons were seized in *Newgate*, p. 42.

—— Account of a remarkable Fragility, Flexibility, and Dissolution, of the Bones, p. 297.

Pyrometer, Description of a new one, with a Table of Experiments made therewith, by Mr. *John Smeaton*, p. 598.

R.

Rain fallen in *S. Carolina*, from *Jan.* 1738 to *Decem.* 1752, by Dr. *James Lining*, p. 284.

Rays of Light, Discourse concerning their different Refrangibility, by Mr. *T. Melvil*, p. 261.

Refracting Telescopes, an Improvement of them, by Mr. *J. Dollond*, p. 103.

Refrangibility (different) of the Rays of Light, *Monf. Courtivron's* and Mr. *Melvil's* Notions about it compared, p. 776.

Richman (Professor), Answer to Dr. *Lining's* Query concerning his Death, by Mr. *Wm. Watson*, p. 765.

Robertson (Mr. *John*), the Construction of the Logarithmic Lines on *Gunter's* Scale, p. 96.

S.

I N D E X.

S.

- Savery* (late *Servington*, Esq;) concerning a Paper of his, relating to his Invention of a new Micrometer, by *James Short*, M. A. p. 165.
- Satellitum Jovis Eclipsium Observationes Ulissipone habitæ Anno 1753, à Joanne Chevalier*, p. 546.
- Sbarp* (Mr. *Samuel*) Description of a new Method of opening the Cornea, in order to extract the crystalline Humour, p. 161.
- second Account of a new Method of opening the Cornea, for taking away the Cataract, p. 322.
- Experiments concerning the Use of Agaric of the Oak in curing Hæmorrhages, p. 588.
- Sbervington* (Mr. *William*) his Observation of *Mercury's* Transit over the Sun *May 6, 1753*, at *Antigua*, p. 318.
